

Xaloy® NeXtwin™ Conical Barrel

Where other barrels end, NeXtwin™ begins again.

NeXtwin™ is the world's first recyclable tungsten carbide conical barrel that combines high wear resistance with sustainable engineering. Designed to be relined and returned to service, NeXtwin™ barrels extend lifecycle value, reduce waste, and lower total cost of ownership. Paired with optimized conical screws, it's the smarter, circular solution for PVC and CPVC processing.

Patent Pending

Benefits

Lowest Total Cost of Ownership

Extend barrel life through reline and reuse, reducing capital spend over time

Multiple Lifecycles

Reusable and recyclable design enables refurbishment for continued service

Sustainability Built-In

Minimize waste and support corporate sustainability goals with a circular solution

Xaloy Performance

Proven tungsten carbide wear protection for demanding PVC and CPVC applications

Features

Construction: Tungsten carbide inlay

Design: Reusable, recyclable, and refurbishable

Compatibility: Works with optimized Xaloy conical screws for maximum performance

Lifecycle Support: Refurbishment program for extended service

Xaloy® NeXtwin™ Conical Barrel

Applications:

- PVC pipe and conduit extrusion
- Window and door profiles
- Siding, fencing, and decking
- Rigid PVC sheet and foam PVC
- CPVC and PVC blends
- Compounding
- Pelletizing
- Other high-wear conical twin applications

Why NeXtwin?

Where other barrels end, NeXtwin™ begins again. Extend lifecycle value, lower total operating costs, and achieve sustainability goals without sacrificing performance.
